

Shehzad Ahmad

Senior Full Stack Web Developer Islamabad, shehzad.joblooking@gmail.com +92 313 051 5490

I have been working with web development since 2018, the period during which I have worked in different environments, from big consultancy companies to start-ups. I am a self-motivated and self-taught professional who likes to solve problems. I merge a passion for usability and user experience with technical knowledge to create cool digital experiences. My repertoire includes programming languages and tools such as Laravel, Vue JS, Tailwind CSS, Wordpress, MySQL, PostgreSQL, Nginx and Apache server configuration, SASS, LESS, Twitter Bootstrap, jQuery, and more. Willing to relocate: Anywhere

Work Experience

Senior Full Stack Developer

Merik Solution - Islamabad
April-2024 to Present

I am working as a Senior Full-Stack Developer at Merik Solution, and also led development teams on different projects. I wore multiple hats and have worked on different projects in highly interdependent team structures. I had multiple responsibilities while working at Merik Solution. Some of them are mentioned below: -

Responsibilities:

- Collaborate with product managers to define project requirements and deliverables.
- Worked collaboratively with the clients in an agile development environment in laravel large scale application.
- Worked collaboratively with the clients in an agile development environment and swiftly introduced new features
- Enhanced application performance by Vue Component based development in view of future
- Vue framework transitions.
- Implemented various screens for the front end using Vuejs and used various predefined components from NPM (Node Package Manager) and vuex library.
- Designed system architecture and developed WEB APIs for multiple projects using Laravel
- Developed highly intuitive and cool front-end interfaces with Vue while keeping all the best practices of a good design in mind
- Implemented security protocols and data encryption to ensure the safety of every system
- Experience building high performance and scalable services for health industry using Laravel.
- Implemented automated tests: unit tests, integration tests, functional tests, and automated UI tests.
- Configured and maintained serverless architecture for different projects
- Documented the codebase as well as technical and operational aspects of the projects
- Established CI/CD pipelines for back-end side code of the projects
- Explored the most effective technologies and came up with creative ideas to achieve the business requirements and goals of clients.

FULL STACK LARAVEL AND NUXT DEVELOPER

Signup Solution - Rawalpindi
May 2023 to April 2024

I worked a Full Stack Developer specializing in Laravel, Vue.js, and Nuxt.js at Signup Solution, where I lead the implementation of innovative web applications. With expertise in the entire software development lifecycle, I drive project technical direction, collaborate with cross-functional teams, and mentor junior developers. Having successfully spearheaded key projects, improved code quality, and contributed to a collaborative team environment, I am committed to advancing Signup Solution's technological landscape and achieving new heights in the ever-evolving field of web development. I worked couple of years and helped them develop many applications for their clients.

Responsibilities:

- Collaborate with product managers to define project requirements and deliverables.
- Responsible for creating efficient design and developing User Interaction screens using VueJS, Tailwind, Nuxt Js.
- Worked with Vue 2 to develop single page applications, worked with vuex for managing Vue State Management applications.
- Expertise in VUE JS framework to develop the SPA. Worked in using Vue JS components, Forms, Events, Keys, Router, Animations and Flux concept.
- Used HTML, CSS and JavaScript to write front-end for multiple single page applications.
- Responsible for maintenance of legacy applications that were written in Laravel.
- Developed and provided support to many internal projects
- Wrote web-scrappers to collect data for business analytics
- Designed and developed dynamic cross-platform and cross-browser compatible page layouts
- Provided technical support to different small startups to medium sized companies

LARAVEL DEVELOPER

Red Cubez - Islamabad,

September 2021 to May 2023

As a Backend Laravel Developer at Red Cubez, I brought my expertise in SQL, PHP, and JavaScript to contribute to the development of robust and scalable web solutions. Specializing in Laravel, I played a key role in crafting efficient backend systems. My skills also extended to frontend technologies, including Vue.js, Vuetify, and Vuex, allowing for seamless integration and enhanced user experiences. Having successfully navigated projects during my tenure at Red Cubez, I am well-versed in delivering impactful solutions. Let me know if you have any questions or if you'd like more information about my past experiences

I worked as a Backend Developer at "Red Cubez" for couple of years and helped them develop many applications services for their clients.

Responsibilities:

- Developed and maintained complex web applications using Laravel and VueJS
- Collaborate with product managers to define project requirements and deliverables.
- Integrated RESTful APIs and managed database operations using MySQL.
- Spearheaded the migration of legacy systems to modern Laravel.
- Participated in agile ceremonies and contributed to sprint planning and retrospectives.
- Enhanced user experience by implementing responsive and accessible design principles.

LARAVEL DEVELOPER

PIMS ABBOTTABAD - ABBOTTABAD,

June 2019 to August 2019

- Supported the development team in building web applications and scripts.
- Gained hands-on experience with front-end technologies and frameworks.
- Participated in team meetings and contributed to project discussions.
- Assisted in testing and bug-fixing efforts.
- Developed foundational skills in web development and software engineering.

Education

Bachelor of Science in Software Engineering

Abbottabad University Of Science & Technology (Havelian)

2017 to 2021

Assessments

Analyzing data — Highly Proficient

Interpreting and producing graphs, identifying trends, and drawing justifiable conclusions from data

Full results: [Highly Proficient](#)

Software developer skills — Expert

Designed by engineering managers and real-world employers, this test gives you hard data points to evaluate technical competency

Full results: [Expert](#)

Attention to detail — Highly Proficient

Identifying differences in materials, following instructions, and detecting details among distracting information

Full results: [Highly Proficient](#)

Numerical reasoning skills — Highly Proficient

Quickly and accurately performing basic mathematical operations, recognizing numerical sequences, and interpreting graphs

Full results: [Highly Proficient](#)

Work motivation — Proficient

Level of motivation and discipline applied toward work

Full results: [Proficient](#)

PHP developmental skills — Completed

Measures a candidate's ability to apply understanding of fundamental PHP data types and structures to identify errors and create scripts.

Full results: [Completed](#)

Logic & critical thinking — Highly Proficient
